Yale School of Medicine, Maternal-Fetal Medicine Postgraduate Research Associate

Paid, full-time position, starting May/June 2020

This is a one-year position to work on pregnancy related clinical research studies in the Department of Obstetrics, Gynecology & Reproductive Sciences, Maternal-Fetal Medicine. Background research experience is preferred. Mentoring is provided as needed for basic lab techniques, analyses, manuscript preparation and Good Clinical Practices. Training will be provided in the conduct of clinical trials, regulatory management (IRB), research design and methodology, data management, biospecimen collection, patient interactions including consent and medical history, data collection and medical record abstraction.

This research involves the use of human biospecimens, including blood, therefore Human Subjects and HIPAA training is provided. Projects include NIDDK funded Glycemic Profiles in Pregnancy study, Maternal Fetal Medicine Unit (MFMU) clinical trials, and Perinatal Research Consortium trials.

This is an ideal position for someone who recently graduated from college (Bachelor’s Degree is required) and is applying for medical or graduate school interested in clinical research. Bilingual, Spanish is a plus.

Please contact Lauren Perley for more information: lauren.perley@yale.edu or 203-500-3995.
