Yale School of Medicine Postgraduate Research Associate

Paid, full-time position, starting June/July 2018

Yale Medicine, Section of Nephrology, is seeking a Postgraduate Research Associate to work in a research laboratory focused on vascular and kidney tissue engineering for one or two years. The associate will work directly with the principal investigator, Dr. William G. Chang, and will learn research techniques, critical thinking, and problem solving skills. Prior laboratory bench research experience and a science undergraduate background are preferred but not required. This would be an ideal position for someone who recently graduated from college and is thinking of applying to medical school or graduate school. If interested, please send letter of interest and resume to Dr. Chang (w.chang@yale.edu).
