Yale Environmental Innovator Community
Jobs and internships at Yale-affiliated environmental startups

January 31, 2020

For general questions about this document, please reach out to:

Ben Soltoff
Environmental Innovation Fellow
Center for Business and Environment at Yale (CBEY)
Tsai Center for Innovative Thinking at Yale (CITY)
ben.soltoff@yale.edu
We demonstrate the environmental and social impact of investments, and help people improve. Our clients are financial advisors in the wealth management industry. Our tools help them communicate about impact so they can provide better financial advice and grow their practice.

Senior Software Engineer -- Tech Lead
Type of role: Full-time
Location: New York City
More information: patrick@yourstake.org

Senior software engineer, fullstack web development. Compensation will be competitive with your current full-time software engineering position - $130-180k base salary with significant equity in fast-growing startup. Django + frontend JS (React). You will have the opportunity to shape the engineering culture as a technical leader, the first technical employee. Please contact patrick@yourstake.org directly with "Yale Software Posting" in the subject and attached resume, link to personal web portfolio, and/or Github handle.

Symbrosia

Symbrosia is developing proprietary technologies to grow at commercial scale the red macroalgae Asparagopsis taxiformis as a livestock feed supplement. At a 0.5% inclusion rate in ruminant feed, this tropical red seaweed confers health benefits to cattle and increases productivity while eliminating over 80% of methane emissions. The first customers for commercially raised A. taxiformis will be consumer-facing dairy companies seeking to reduce their supply chains’ carbon footprint.

Macroalgae Lab Intern
Type of role: Internship
Location: Kailua-Kona, HI
More information:
https://static1.squarespace.com/static/5aedccb7f93fd4603e619724/t/5e28d4a2c2509c20c667b173/1579734178443/Macroalgae+Lab+Intern.pdf
Interested in developing your knowledge around Macroalgae cultivation for use in value-added markets? Symbrosia is looking for a summer lab intern to assist in increasing productivity and biosecurity of large-scale algae culture for use as a livestock feed supplement.

Environmental Engineering Intern
Type of role: Internship
Location: Kailua-Kona, HI
More information:
https://static1.squarespace.com/static/5aedccb7f93fd4603e619724/t/5e28d44ed2e9fa1df80f1520/1579734094856/ENVE+Intern.pdf
Symbrosia is looking for a summer intern to join us at our Hawaii location. This individual will work to develop a prototype organic carbon reactor to recycle fish waste from commercial farms.

Computer Vision Intern
Type of role: Internship
Location: Kailua-Kona, HI
More information:
https://static1.squarespace.com/static/5aedccb7f93fd4603e619724/t/5e28d452a9d342214848712d/1579734099057/Computer+Vision+Intern.pdf
Want a project to put your computer vision skills to the test or develop a new understanding of image analysis? Symbrosia is looking for a summer intern to join us in Hawaii to develop a computer vision program to analyze seaweed culture growth and health.

Soltage is a leader in the development, financing, and operation of distributed utility-scale solar assets for commercial, industrial and municipal customers across the United States. Soltage has developed more than 100 solar energy projects with more than 300 MW total distributed generating capacity under construction and management.
CEO/Co-Founder
Type of role: Full-time
Location: Continental US
More information: https://www.soltage.com/careers.html hr@soltage.com

Silviateerra is a precision forestry company that runs a market for high-quality forest carbon credits. By using satellites and AI to measure every acre every year, Silviateerra enables all landowners to participate in forest carbon markets. In collaboration with Microsoft, Silviateerra created the first high-resolution forest inventory of the US.

Forest Carbon Sales
Type of role: Full-time
Location: San Francisco
More information: max@silviateerra.com
Silviateerra markets forest carbon offsets to the chief sustainability officers at Fortune 500 companies. Help us meet the surging demand for high-quality forest carbon credits

Revert Technologies, Inc (Project Smart Power)
We believe in a future where devices communicate to each other via an IoT platform, enabled by 5G telecommunications and coordinated by AI technology. To build such a future, we start by producing smart powerstrips for homes and offices. This is so we can acquire experience in manufacturing and distributing hardware, explore creative software design, and stay in touch with customers to continuously provide efficient and reliable energy management software and appliances.

Electrical / Computer Engineer
Type of role: Internship
Location: Northeast & Midwest
More information: ryan.li@revert-tech.com
We have a functional hardware prototype and app. We are in process of collecting customer feedback and looking for supplier to go to market. We are looking for a savvy programmer to help us integrate our IoT platform with AWS and a few other outlets via API and perfect our app’s UI/UX.

https://www.hugoandhoby.com/

At Hugo & Hoby, we design and fabricate custom, locally crafted and sustainably made furniture and architectural elements for commercial spaces like offices, restaurants, hotels, and Universities by working with a network of over 75 local fabrication shops, foresters, and designers.

**Internships TBD**

Location: New Haven and Washington, DC

Positions will be posted later in the semester. Check the website for more information.

---

**Green Cities-Green Villages**

Our goal is to provide capacity-building and advocacy services to grassroots and women-led sustainable development organizations and initiatives in developing countries with emphasis on leadership training through a climate justice and governance fellowship program.

**Development Fellow**

Type of role: Internship

Location: New Haven

More information: yaniquej@yahoo.com

Development fellow will assist in preparing grant proposals to potential foundation funders and major donors as well as follow-up correspondence and phone calls.
Forests offer so much more than we realize. At Forested Foods, we work within the understory in partnership with local communities to sustainably cultivate the most distinctive forest-based bee products, spices, gums/resins, fruits, and other botanicals. We guide our clients – enlightened natural products and food connoisseurs – to the source of origin and contextualize each product’s unique characteristics. Engage your senses and join us to discover all that forests have to offer.

**Marketing and Communications Intern**  
Type of role: Internship  
Location: TBD  
More information: ariana.yuen@yale.edu

**Operations Intern**  
Type of role: Internship  
Location: NYC  
More information: ariana.yuen@yale.edu

www.ennuityholdings.com
We are creating an annuity-like service contract out of the characteristics of solar energy. Our “ennuity” allows consumers to get rid of their entire electricity bill for several years, or even a lifetime, in return for a one-time payment. We channel that upfront payment into solar power infrastructure investment, which we then use to supply the customer with power.
**Head of Customer Development**
Type of role: Full-time  
Location: Texas  
More information: nisha@ennuityholdings.com  
Looking for someone to be the link between customer needs and product development. This will include marketing and branding strategy and positioning.

**Coral Vita**

www.coralvita.co  
Coral Vita grows corals to restore dying reefs. 50% of reefs are dead and 90% will die by 2050, threatening biodiversity alongside the livelihoods of 1B people who depend on their valuable tourism, fisheries, and coastal protection benefits. We use a land-based farming model to raise coral up to 50x faster while strengthening their resiliency to climate change. By selling restoration to customers that depend on reefs' ecosystem services, we can preserve coral reefs for future generations.

**Aquaculture Specialist**
Type of role: Full-time  
Location: The Bahamas  
More information: info@coralvita.co  
We’re looking for someone who knows how an aquaculture system works: from the pumps and pipes to the filtration and life support systems. Experience running ex-situ systems is a must, and exposure to handling corals greatly preferred.

**Coral Scientist**
Type of role: Full-time  
Location: The Bahamas  
More information: info@coralvita.co  
We’re looking for an innovative mind with a strong background in coral biology and reef ecology. Ideally, this person will be a tinkerer that is excited about finding new innovative ways to grow corals faster and stronger in ways that are more effective and efficient for large-scale reef restoration. Experience with asexual and/or sexual coral propagation preferred.
Brazen Eats is a branded line of frozen prepared foods that are 100% plant-based. We currently partner with Beyond Meat to use and feature their product as an ingredient (e.g. "Made with Beyond Meat"), while building our own brand, Brazen Eats. Our first product is a Ginger Scallion dumpling. We currently sell at farmers markets and pop-up events at breweries with the goal to sell wholesale to grocery stores / Costco / convenient stores.

Multiple internship opportunities (see description)
Type of role: Internship
Location: Boston / New England
More information: sarah.mandlebaum@gmail.com
We are looking for help with a number of priorities depending on your skills and interest. Priority areas include: 1) Product Development (recipes and taste testing, working with co-packers), 2) Brand Development (qualitative and quantitative market research, social media, packaging design), 3) Customer development (talking to potential sales channels such as University foodservice, grocery, etc), 4) Finance (create financial projections and identify fundraising needs)

Blue Sky Analytics

Blue Sky Analytics: Geospatial Data + AI to build Bloomberg for Environmental Data.
Blue Sky Foundation: India based foundation with an aim to move the needle on climate action by targetting Plastic & Reforestation.

Looking for data, tech, strategy, research, sales folks to join India based AI and Geospatial Data startup building global air, water, land, climate risk datasets.
Climate Risk Associate
Type of role: Internship
Location: India
More information: https://blueskyhq.in/join-us, career@blueskyhq.in

Sales Manager, Air Quality Data Products
Type of role: Full-time
Location: India
More information: https://blueskyhq.in/join-us, career@blueskyhq.in

Research Associate, Single-Use Plastic
Type of role: Full-time
Location: India
More information: https://blueskyhq.in/join-us, career@blueskyhq.in

Summer Associate, Reforestation & Land Management Plans
Type of role: Internship
Location: India
More information: https://blueskyhq.in/join-us, career@blueskyhq.in

Data Scientists
Type of role: Full-time
Location: India
More information: https://blueskyhq.in/join-us, career@blueskyhq.in
If you are an AWS and Python Maverick, write to us.
